

**IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-9. (*Canceled*)

Claim 10. (*Currently Amended*) A T-connector holding tool, comprising:

a handle having a grip portion and a mounting lug extending from the grip portion, wherein said lug has a square drive adjacent the grip portion;

wherein said square drive includes a spring-biased ball bearing extending from the square drive;

said mounting lug including a cylindrical end portion;

a head having a cylindrical body, the cylindrical body having a bore defined therein, the mounting lug being removably inserted into the bore in order to attach the head to the handle; and

first and second claws attached to the cylindrical body in parallel, spaced relation, each of the claws having a pair of jaws dimensioned and configured for simultaneously gripping coaxially aligned nuts of a T-connector in order to prevent rotation of the T-connector when adjusting a nut on stem of the T-connector.

Claims 11-13. (*Canceled*)

Claim 14. (*Currently Amended*) The T-connector holding tool according to claim [[12]] 10, wherein the bore defined in the cylindrical body of said head has a square shaped bottom end having at least one detent hole defined therein, the ball bearing snapping into the detent hole to temporarily secure said head to said handle, and a cylindrically shaped top end receiving the cylindrical end portion of said mounting lug.

Claim 15. (*Original*) The T-connector holding tool according to claim 10, wherein each said claw has a smooth, arcuate, cylindrical interior surface.

Claim 16. (*Original*) The T-connector holding tool according to claim 10, wherein said bore extends axially through said cylindrical body.

Claim 17. (*Original*) The T-connector holding tool according to claim 10, wherein said bore extends transversely through said cylindrical body.

Claims 18-21 (*Canceled*)
